Professional Summary

Hello! I'm a 19 years old full stack developer graduated from high school and currently studying a degree in systems engineering. I aspire to get a job opportunity in which I can grow personally and professionally.

I am a full stack developer with experience developing web and mobile applications using the following technolgies:
Git | HTML | CSS | Javascript | TypeScript | Front-End | Back-End | Data Structure | Database | Algorithms | ES6 | Material UI | Less | React | React Native | Microservices | Redux | Node | Express js | SQL | PostgreSQL | Sequelize | AdobeXD

I like challenging myself with latest tech trends so I can develop and innovate awesome products with great efficiency, functionality and usability.

I consider myself carismatic, meticulous, autodidact, organized and ambitious. When I put my mind into something, I won't give up until it's done :)

I love working on teams and I am advocate of writing clean code.

In my spare time, I like to surf the internet looking for new ways/technologies to implement on my own projects (you can check those on my GitHub), thats how I try to learn a new thing every day.

I used to work as a nightclub DJ as a hobbie.

Languages

Spanish - Native Speaker

English - Fluent Speaker

Soft Skills

Time Managment

Leadership

Teamwork

Experience

Professional DJ for events and parties, Freelancer.
Montevideo, Montevideo
[Mar. 2016](#) – [Mar. 2020](#)

As a hobby, I used to work as a DJ in nightclubs in my free time

- Worked on Uruguay's best nightclubs such as "Ocean Club Punta del Este", "Plaza Mateo", "Mona", "Monroe Club".
- Live mixing of music for about 5-6 hours with no breaks.
- Control the lights and sound of events, before and after
- Construct and position properties, sets, lighting equipment, and other equipment.
